FUEL CAPACITY: 800 GAL

POWER: MAN D2868 V8, 1000HP  
CRUISING SPEED: 18 KNOTS  
TOP SPEED: 26 KNOTS

In addition to our recreational sportfishing vessels, Tideline also builds commercial fishing vessels that are built to the client specifications required to meet commercial fishing licences. A Southerly Design boat, many elements of the design on this latest build were refined during the build, placing an emphasis on crew comfort and operational versatility to meet the needs for various fishing seasons, and adding systems required for longer trips. In addition to building a boat ideal for commercial purposes, the cabin was designed and finished to also be suitable for recreational use.

**Accommodation** - 2 bunks (4 crew) in the bow with full beam captain's quarters under the main cabin. Table in the u-shaped settee drops for an additional berth.

## Deck Equipment

**Slack, Hauler** designated for managing the buoy line with a main hauler for the crew working station.

**Refrigerated Sea Water system** across 5 tanks with 2 of the capable of being isolated and operated as freezers for longer trips.

**Heated toilet and shower room** on the deck's port side double's as a drying room for wet weather gear.

## Additional Systems

**ZF gear box** and smart command system allowing vessel to have high speed performance and low-speed control. Trolling at 1.8 knots, ideal for prawn and longline operations.

**Open water solar panels** capable of providing up to 20amps of 24V power

**Furno multi-function display**

**Simrad Autopilot**

**Starlink internet**

**Sound - Sonos**

**Dometic Hydronic heating system** to support year round operation.
